

Numerical Methods

Motivations:

- Nature of the course.
- Different objectives from existing video clips.
- COVID19 disruption.

Well-organized course materials.

Providing basics necessary for finding numerical solutions of differential equations.

Avoiding of large group of people staying together in closed space for a long period.

Course Features:

- Distinguished approach from traditional teaching.
- Less mathematical proofs.
- Spreadsheet & non-pythonic coding.

Stubborn (in engineering) lecturer.

Uneducated (in mathematics) lecturer.

Newbie in python.
